

CS 362 In-Class Exercise 4: Project Beta Testing

Your name: Brett Thompson

Project team number that you are testing (e.g., team 1): 20

PART-1: Organization and Purpose (2 pts)

Q1) Does the repository provide a README explaining the purpose of the software? If yes, based on reading that documentation, do you understand all the interesting features provided by the software? Do you have any advice to improve that documentation?

Yes, in the game you can move and trigger battles, the readme has links to other files specially for building, developing, etc.

The User Manual presently looks very similar to the README.md, you should flush those out more, maybe include FAQ mistakes that might get made.

PART-2: Installation and Setup (1 pts)

Q2) Is the documentation to install or setup the software available? (Note that for a web application, it would be a URL to access the website and instructions to host the website on a server). When following the instructions, do you face any difficulties while installing the software (accessing the URL for a website)? If yes, please explicitly state what issues you encountered, so that the project team can fix them.

NOTE: If you are testing a web application, then you do not need to set up a web server and try hosting the web application. Just go through the documentation to find out if it clearly explains the steps to host the website.

Yes,

Running [cmake ..] required dependencies not installed by default, but they did mention which dependencies to install

Running build script places CWD into build, and then there is an instruction to cd build

PART-3: Functional and Non-Functional Testing (2 pts)

Q3) Select a use case for the application-under-test and use your creativity to test the application in different possible ways. For example, if you are testing a login functionality, then test the sign up feature, sign in, adding invalid credentials, special characters, etc. Please provide the details of the use case you tested on the software by describing exactly what all you did and in what order? Make sure you are making notes while doing this. If you find any issues (e.g., something that was confusing, incorrect, or not working at all), please provide as many details as you can to replicate the issues so that the team can fix them.

Purple screen appeared, but did not say battle

[WorldState] Wild encounter! Transitioning to battle...

Failed to load font "assets/fonts/default.ttf" (failed to create the font face)

Failed to load font "../assets/fonts/default.ttf" (failed to create the font face)

Failed to load font "/System/Library/Fonts/Helvetica.ttc" (failed to create the font face)

Failed to load font "C:/Windows/Fonts/arial.ttf" (failed to create the font face)

Failed to load font "C:/Windows/Fonts/calibri.ttf" (failed to create the font face)

WARNING: Failed to load battle font. Text will not display.

[BattleState] Initialized

"Animated Movement"

After exiting there is a high chance of jumping into another battle immediately
